

# Ex-Mineral Insulated Thermocouple model 2G

for gas explosion hazardous areas and areas with combustible dust

In general   

The temperature sensors manufactured by Reckmann GmbH (R58®) are solely intended for the measurement of process temperatures in solid, liquid and gaseous media. This design allows direct screwing into the process connection of a vessel or pipeline.

## Application area:

Autoclave, machine and plant engineering, chemicals industry, power plant technology, industry of building materials, recycling.

Depended on electrical and thermal parameters for operating with the following types of protection:

II 1/2G Ex ia IIC T1...T6 Ga/Gb or  
II 1/2D Ex ia IIIC T135 °C Da/Db.

**For installation please see our operating instructions.**

**Stock-number-code: TR15-D.**
